Prototype for Examination in an Electronic Environment

In an effort to support the re-engineering of the patent process at the U.S. Patent and Trademark Office (PTO), the PTO is implementing a limited prototype electronic processing and examination system. Effective immediately, a special box will be established for filing of correspondence related to this prototype. Additionally, *for purposes of this prototype only*, the requirement of 37 CFR 1.4(d) that correspondence must be signed in permanent ink is waived under 37 CFR 1.183 only to the extent that it will be permissible for a person to place "/s/" on the signature line of an electronic document as the original signature. The requirement of 37 CFR 1.4(d) that the original signature (i.e., "/s/") be personally signed by that person is not waived by this notice. The printing of that electronic document by PTO personnel will result in "/s/" being printed on the signature line of the paper copy which is placed in the official paper file wrapper. Patent process customers whose participation in this prototype is solicited by the PTO will be

so notified by separate letter, including detailed instructions regarding prototype participation requirements.

Establishment of a Special Box for Design Patent Applications

Effective immediately, the Patent and Trademark Office (PTO), as a part of the current reengineering effort, has established a special box for filing design patent applications and papers for design applications. Use of this box will allow the PTO to provide more efficient and effective handling of these applications and papers for customers.

To take advantage of this new service, the envelope should be addressed:

Box Design
Assistant Commissioner for Patents
Washington, D.C. 20231

Because all processing of design patent applications, including fee processing, from the initial filing of the design patent application through payment of the design issue fee will now be performed in Examining Group 2900, design patent applications and all papers for these applications may be hand-carried directly to Examining Group 2900 or mailed to Box Design. Petitions and amendments filed under 37 CFR 1.312 submitted for design patent applications will also be processed in Examining Group 2900 and thus may be filed directly in Examining Group 2900 or mailed to Box Design. All regular methods of filing papers for design patent applications will still be available but the utilization of Box Design will enable the PTO to provide better customer service.

In order to facilitate speedier processing of papers, it is requested that papers and fees for design patent applications be submitted separately from papers and fees for utility patent applications.

Reengineering The Patent Process

The U.S. Patent and Trademark Office (PTO) began a long term effort to reengineer the patent process in March of 1995, responsive to customer requests for greater flexibility, and accelerated by the presidential mandates of the National Performance Review. The major goals of the project are to increase the quality of examination, reduce internal processing time, enhance customer satisfaction and improve employee morale.

Over 150 employees from throughout the patent examining corps and support areas participated in the development of a new concept of operations. This high level description of the reengineered patent process was completed in September of 1995. A major effort is now underway to plan for the transition from current practices to those envisioned in the concept of operations.

A necessary part of planning for the transition to the reengineered process is to prototype/pilot the proposed changes to determine their effectiveness and their contribution to the realization of PTO goals. A number of immediate initiatives have been identified for prototyping/piloting in the upcoming months. Several of these prototypes/pilots will involve the participation of patent process customers. As these immediate initiatives develop, additional Official Gazette notices will be published containing further details about the initiative and instructions for customers who may be participating in the prototype/pilot or may be affected by it.

As the reengineering effort unfolds in the future, it is expected that many new practices and procedures will be prototyped/piloted. As our customers, your participation, and your feedback, are welcomed.

Reference Collections of U.S. Patents and Trademarks
Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs have both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that preliminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

*A communication from the examiner should have been received in most applications filed prior to this date.

Patents will Expire as Follows:

(1) The term of any utility or plant patent that is in force on or results from an application filed before June 8, 1995 is the greater of the 20 year term provided in 35 U.S.C. 154(a)(2) or 17 years from grant subject to any terminal disclaimers. 35 U.S.C. 154(c)(1).

(2) All utility and plant patents granted on applications having an actual United States filing date on or after June 8, 1995 are granted for a term which begins on the date on which the patent is granted and ends 20 years from the date on which the application was filed in the United States. If the application contains a specific reference to an earlier application under 35 U.S.C. 120, 121 or 365(c), the patent term ends twenty years from that date on which the earliest application was filed. 35 U.S.C. 154(a)(2).

(3) All design patents are granted for a term of 14 years from the date of the grant.

However, the term of any patent may have been curtailed by disclaimer under the provisions of 35 U.S.C. 153, have lapsed due to failure to pay maintenance fees, or have been extended under the provisions of 35 U.S.C. 154, 155, or 156. Thus, if more reliable information is needed with respect to a particular patent, then the specific patent file should be reviewed to determine the actual date of patent expiration.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.
